

TECHNICAL DATA

DO0150SWD

GENSET SPECIFICATIONS		
Prime Power (PRP)	150 KVA	120 kW
Stand-by (LTP)	165 kVA	132 kW
Power factor (cosphi)	0,8	
Voltage	400/230 V	
Frequency	50 Hz	
ENGINE SPECIFICATIONS		
Brand	DOOSAN	
Туре	DP086 TA	
Net engine power prime	132 kW	
Net engine power stand-by	147 kW	
Aspiration	TC	
Cycle	diesel 4 stroke	
Cooling	water	
Speed	1500 r.p.m.	
Cylinders	6 L	
Bore x stroke	111 x 139 mm	
Displacement	8,071	
Fuel consumption 75% prime power	26 l/h +/- 5%	
Oil consumption	0,4% of fuel consumption	
Oil sump capacity	15,5 l	
Coolant system capacity (engine & radiator)	44	
Standard voltage	24 V	
Governor type	electronic	
ALTERNATOR SPECIFICATIONS		
Power (PRP)	150 kVA	
Overload	10% for 1 hour	
Voltage	400/230 V	
Frequency	50 Hz	
Speed	1500 r.p.m.	
Temperature rise	Н	
Insulation class		
Illisulation class	Н	
Degree of protection	H IP 23	
Degree of protection STANDARD EQUIPMENT		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts Exhaust gas silencer		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts Exhaust gas silencer Built-in fuel tank 120 l		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts Exhaust gas silencer Built-in fuel tank 120 I First filling oil		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts Exhaust gas silencer Built-in fuel tank 120 I First filling oil Skidbase with antivibrating shock-absorbers		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts Exhaust gas silencer Built-in fuel tank 120 I First filling oil Skidbase with antivibrating shock-absorbers Lead type batteries with cables and tray		
Degree of protection STANDARD EQUIPMENT Starting motor and alternator battery charger Dry air filter with removable element Radiator mounted on skidbase Water preheating system Protection for fan and moving parts Exhaust gas silencer Built-in fuel tank 120 I First filling oil Skidbase with antivibrating shock-absorbers	IP 23	

Rating according ISO 8528

Prime Power (PRP)

It is defined as being the maximum power which a generating set is capable of delivering continuously whilst supplying a variable electrical load when operated for an unlimited number of hours per year under the agreed operating conditions with the maintenance intervals and procedures being carried out as prescribed by the manufacturer. The permissible average power output over 24 h of operation shall not exceed 70% of the prime power. A 10% overload capacity is available for a period of 1 hour within a 12-hour period of operation.

Limited-Time Running Power (LTP)

It is defined as the maximum power available, under the agreed operating conditions, for which the generating set is capable of delivering for up to 500 h of operation per year (of which no more than 300 for continuative use) with the maintenance intervals and procedures being carried out as prescribed by the manufacturers. No overload capability is available.

TECHNICAL DATA

D00150SWD

CONTROL PANEL

Genset control with automatic management of load transfer DG/Mains

Controller with thresholds, counters, alarm, status

LCD display with pushbutton access for monitoring electrical and mechanical parameters

Advanced programmable I/O functions

Multilanguages text for measurements setting and messages

Remote communication interface

List of events

Static battery charger

SOUNDPROOFED CANOPY

Highly corrosionproof

Electrogalvanized steel structure with modular components

Antianimal protection grid (air intake)

Exhaust silencer with rain flap

Insulation with material in fire reaction class A1

Doors with yale type key

Emergency stop

Easy connections for cables installation

AVAILABLE OPTIONS

Different soundproofing levels for canopied gensets

Solutions for arctic or hot environment

A wide selection of genset controllers and synch panels

Additional alarms (warning / shutdown)

Extended fuel tank capacity

Automatic refuelling kit

Automatic transfer switch panel (ATS)

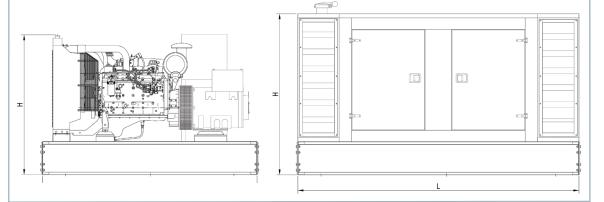

Residential Silencer (for open set only)

Leak proof tray

Special tools

DIMENSIONS AND WEIGHTS

Open set on skid base	LxWxH: mm 2600x1620x1700	Dry: kg 2000
Soundproofed canopy Silent version	LxWxH: mm 3600x1620x1950	Dry: kg 2600
